

Penrillian to bring applications and its mobile development expertise to the BlackBerry platform

Penrillian Joins BlackBerry Alliance Program

Mobile software developer Penrillian is pleased to announce that it will bring its applications and mobile development expertise to the BlackBerry® platform, and has joined the BlackBerry® Independent Software Vendor (ISV) Alliance Program. Penrillian, which develops applications mainly for the mobile market, will now have access to business and technical resources available from Research In Motion (RIM), the company behind the BlackBerry® solution. Joining the programme will help Penrillian provide an improved service to customers, and will help the company better create and launch applications for the BlackBerry platform.

The BlackBerry ISV Alliance Program provides a comprehensive set of resources that help members develop and market applications and solutions on the BlackBerry platform. For more information on the BlackBerry ISV Alliance Program, please visit: www.blackberry.com/partners.

Penrillian CEO Charles Weir said, “In the past, Penrillian has been seen as an expert in Symbian OS, but the industry has moved on, and we are now platform-agnostic. Being a member of the BlackBerry ISV Alliance Program will not only help us improve our service to customers but also help position Penrillian as a key innovator in the mobile applications market.”

About Penrillian:

Penrillian is an established supplier of software development services for the mobile industry. Found in 2000, Penrillian has grown steadily and has gained a reputation both as a creator of high quality software, and as a trusted partner for many global companies.

Penrillian is led by Charles Weir, one of the pioneers of the mobile software industry. As lead architect on the Ericsson R380, he helped define the mobile phone as we know it today.
